

A vertical image of a colorful nebula, likely the 'Hand' nebula, featuring a prominent structure resembling a hand reaching upwards. The nebula is composed of various colors including blue, purple, yellow, and orange, with numerous bright stars scattered throughout. The background is a deep black space filled with distant stars.

***Online
Viewing
Sessions***

Kalamazoo Astronomical Society
www.kasonline.org

Online Viewing Sessions utilize the KAS Remote Telescope that is located under the dark desert skies of southeastern Arizona. Attendees will view images of deep-sky objects captured with the system's CCD cameras in Arizona, transmitted to participant's computer and smart phone screens in southwest Michigan and around the world. Images acquired during each session will be made available for download.

If weather conditions necessitate a cancellation there will be a second "cloud date" scheduled the following Saturday. Postponement or cancellation information will be posted on our website.

2020/2021 Season Schedule

PRIMARY DATE	CLOUD DATE	TIME
November 7 th	November 14 th	8:30 pm
December 5 th	December 12 th	8:30 pm
January 9 th	January 16 th	9:00 pm
February 6 th	February 13 th	9:00 pm

Online Viewing Sessions will be **held on the video conferencing service Zoom**. Please email us at kas@kasonline.org to join in. Admission is FREE!

The KAS Remote Telescope consists of a 4-inch Takahashi refracting telescope mounted on a 20-inch PlaneWave CDK telescope, both equipped with identical full-frame CCD cameras.
